Choose the right solution

When you're looking for the perfect headset, there are things you need to consider.

Where are you working?

At office desk

You spend most of your time in the office, at the desk and on the phone. Includes task-based knowledge-workers for Speak and Evolve series of products.

Around the office

You spend more time in the office than on the road but you need freedom in the office to perform.

On the go

You spend more time on the move and you need to be able to work from anywhere.

What do you want to connect?

You'll need to consider your connectivity needs to make sure your headset solution is compatible with your phone system. You can always contact a Jabra reseller if you need more advice.

Traditional desk phone

Softphone/Voip

Smartphone

Tablet

Multiple devices

Consider the noise in your work environment

The right speakers and microphone ensure quality sound on both ends of the call.

Low noise

Omni-directional microphones pick up sound from any direction and block ambient and surrounding noise. Fine for the traditional, low-noise office.

Average noise

Noise cancelling microphones and a mono speaker reduce unwanted background noise while ensuring you're still aware of your surroundings.

High noise

Noise/ultra noise canceling microphones combined with duo speakers filter aggressive noise and can block the sound of someone sitting right beside you.

ANC or PNC? Choose the right noise cancellation technology for your office.

Active Noise Cancellation (ANC)

Eliminates low frequency office noise such as air conditioning and sounds in the distance. Not suited to high frequency noise like lots of speech nearby. Best for task-based workers who need to collaborate and concentrate.

Passive Noise Cancellation (PNC)

Eliminates high frequency noise like nearby voices. Helps block out office noise too. Best for call-centric workers on the phone most of the day.

Wireless or corded?

Wireless headset solutions

Great if you want to move away from the desk or if you want a streamlined cordless design.

Corded headset solutions

Perfect if you only work at your desk and you want the best possible sound quality in one or both ears.

Jabra is a Microsoft Gold Communication Partner. Our Microsoft-compatible headsets don't just work for calls - turn your telephone headset into your ideal office headphones with ease too, and experience impressive sound quality all while getting your work done. Jabra sound solutions work seamlessly with all Microsoft products, including: Microsoft Skype for Business, Microsoft Office 365, Microsoft Cortana and Microsoft Teams.
