GN Netcom Counted Among Top Finalists for the 2008 Microsoft Partner of the Year Award

COPENHAGEN, DENMARK June 16th 2008 – Today GN Netcom, the world leader in innovative headset solutions, announced it has been selected as a finalist for the Microsoft Partner of the Year award in OEM Hardware Solutions, Device Manufacturing.

The Microsoft Partner Program Awards recognize Microsoft partners that have developed and delivered exceptional Microsoft-based solutions over the past year.

“We value our close working relationship with Microsoft and have collaborated to develop a range of headsets that enhance the user experience of Microsoft’s new Office Communicator 2007 softphone by providing full wideband audio and plug-and-play capability” commented Jan McNair, VP, GN Office Business. “Being shortlisted for the award is a great accolade and demonstrates our understanding of Microsoft’s products and solutions as well as our joint commitment to increasing business efficiency by giving professionals access to the communication tools they need to get their job done, regardless of location.”

Awards will be presented in a number of categories, with winners chosen from a pool of more than 2,000 entrants worldwide. The OEM Hardware Solutions, Device Manufacturing Partner of the Year award is designed to recognize independent hardware vendors or original device manufacturers who design and develop hardware peripheral and device solutions that use Microsoft technologies to create superior customer value.

“Partners are critical to delivering rich business solutions and innovative excellence to customers,” said Allison Watson, Corporate Vice President, Worldwide Partner Group, Microsoft. “Congratulations to the 2008 Partner Award winners who have each demonstrated innovation beyond measure and an unswerving commitment to delivering the highest levels of customer satisfaction. We look forward to these partners continuing to raise the bar in the design and deployment of customer solutions built on Microsoft technologies.”

PRESS RELEASE

GN Netcom has developed a suite of corded and wireless products that are optimized for Microsoft Communicator 2007. The suite includes the following key products:

- The Jabra GN9350 OC is the only wireless headset on the market that enables users to switch seamlessly between PC-based VoIP and a traditional desk phone. It offers a conference call capability, three wearing styles and an optional hot-swappable interchangeable battery for 'around-the-clock' talk time.
- The Jabra GN9330 USB OC is a lightweight wireless headset with a range of up to 100 meters. It weighs less than 25 grams and offers up to six hours talk time.
- The Jabra GN2000 USB OC is a wired dual-speaker headset that offers outstanding comfort thanks to an extra-thick pivoting foam ear-cushion which automatically adjusts to the shape and angle of the user's ear.
- The Jabra GN2000 USB NC OC is fitted with a Noise Canceling microphone that eliminates background noise for clearer calls in noisy working environments.

Product or service names mentioned herein may be the trademarks of their respective owners.

About GN Netcom

Through its Jabra brand, GN Netcom is a world leader in innovative headset solutions. With around 1,200 employees and sales offices around the world, GN Netcom develops, manufactures and markets a broad range of wireless headsets for mobile users and both wireless and corded headsets for contact centre and office-based users. GN Netcom's business activities also include its original equipment manufacturing (OEM) business. GN Netcom is a subsidiary of GN Store Nord A/S.
