BT5020MULTIUSE

WITH USB BLUETOOTH DONGLE

Superior comfort for mobile phones and PC based IP telephony

Wear the Jabra BT5020 Multiuse headset as you like. For ultimate comfort it is designed with a rotating earpiece that allows you to wear it on either ear. Combined with the lightweight design it is easy to forget you are even wearing it.

It connects wirelessly to your Bluetooth mobile phone and simultaneously to your personal computer via a Bluetooth dongle. So now you just need one headset for your mobile and PC based phone calls.

Developed for the active professional in the office and in the field, the Bluetooth dongle is very easy to use. It is a true plug-and-play device with no driver requirements.

The Jabra BT5020 Multiuse headset with Bluetooth dongle is the comfortable choice for everyone on the go.

One headset for all your needs

Jabra

What is Multiuse?	Multiuse is a range of Jabra headsets from GN featuring MultiPoint technology that allows simultaneous connection to several Bluetooth enabled devices
What is Bluetooth wireless technology?	Bluetooth wireless technology is a radio technology developed to deliver short-range wireless mobility. Bluetooth technology eliminates wires between devices, such as mobile phones and headsets, and enables communication between devices that are in close proximity to one another. Bluetooth facilitates fast, secure transmissions of both voice and data. More information is available at www.bluetooth.com or www.bluetooth.org
