

How to upgrade your Jabra GN2000 OC headset with mute functionality

1. Insert your Jabra GN2000 USB cable to the USB port
2. Run the file "GN2000_USB_OC_mute.exe" which you download from the support page
3. Follow the on-screen instructions

The headset will now have the mute function enabled and works by pressing the middle of the volume button. A red flashing light will indicate when mute function is active.
