

Jabra Direct For Windows and macOS

Personalize your device with smart, secure and free software

Jabra Direct is a software solution that enables you to personalize and optimize the use of your Jabra USB solution in a user friendly desktop interface offering complete integration of your softphone and headset.

Jabra Direct has two core functions

- Readiness status - Overview of all active USB-device and which softphones they are connected to
- Personalize the device - Adjust settings, control firmware updates and remote call control

Secure and free software

Jabra Direct is free of charge and is compliant with the SOC II Type 1 data protection standard*.

How to get Jabra Direct

Jabra Direct can be downloaded from: www.jabra.com/direct

Jabra Direct can be deployed to individual users via [Jabra Xpress](#).

At a glance:

Smart software

- The device can be personalized in areas like ringtone, sound optimization for music, audio protection level, sidetone level and many more areas to optimize the usage of the device .
- You also get remote call control with supported softphone systems.
- The software update mechanism enables you to get the latest firmware for all devices and keep them updated for optimal usage, security and performance.

Compatibility and remote call control

Jabra Direct provides compatibility between Jabra USB devices and an extensive range of softphones. This enables you to have remote call control (answer/end call, mute, redial etc.) from your Jabra audio device over your softphone(s). The remote call control features available for each softphone can be seen in below Softphone/Feature matrix. The exact softphones supported (names and versions) can be seen in below softphone compatibility list.

Features - Windows and macOS	
What is Jabra Direct	Jabra Direct is an application with a simple user interface that enables you to get your Jabra device(s) connected to softphone(s) and ready for calls and music. It also allows you to personalize your Jabra device, update your device firmware for the best possible performance, and get remote call control over your softphone(s).
Remote call control	Jabra Direct enables you to have remote call control (answer/end call, mute, redial etc) from your Jabra audio device. Jabra Direct will automatically detect and enable remote call control for the softphones installed on your computer.
Dashboard	The Jabra Direct dashboard is a user friendly status menu available from the desktop notification area, typically accessed via the lower right corner of the desktop. The dashboard shows the status of your headset, if any updates are available, and if your softphone(s) are ready for use. By clicking your Jabra device in the dashboard, you will be linked into the Jabra Direct main application for managing setting preferences, start firmware updates or access applications that might be available for your Jabra device
Settings	The device setting control in Jabra Direct enables you to configure your Jabra audio and video device to fit you personal preferences.
Firmware update	The Jabra Direct Firmware Updater is a native functionality within the Jabra Direct app which enables a seamless upgrade of firmware on your Jabra devices. Jabra releases updates that improve performance and add new functionalities to your headset, speakerphone or camera. To receive firmware update notifications, go to Settings and switch Update Notifications to 'On'.
