

## EVOLVE 80

**Engineered to help you concentrate.** Professional corded headset to boost your focus in the open office.

### Great Noise Cancellation

Built to eliminate noise, Jabra's unique Active Noise Cancellation (ANC) filters out low-frequency background noise. Unique designed ear cushions block high-frequency sounds so you can enjoy your music or phone calls without distraction. Noise-cancelling microphone makes sure that you and the other party can hear each other loud and clear.

### UC-certified means UC-satisfied

When collaboration is easy, everyone is happy, with both their UC platform and their headset. Evolve 80 is UC-certified and available in a Microsoft Teams-certified variant, for truly seamless communication.

### Simple plug-and-play setup

Installation is as easy as simply plugging it into the USB-A or USB-C port or 3.5mm jack to your laptop, or by using the 3.5mm jack straight into your mobile device.

### Intuitive control unit

Get easy access at your fingertips to the most used functions, like answer calls, volume up/down, and mute microphone.

### Signal your availability

Whether you are on a call or working on a task needing your full attention, the Jabra Evolve 80 has an integrated busylight on the ear cups, letting people around you clearly see your availability. You can activate the red busy light to create your own concentration zone and keep you from being disturbed whenever required. Jabra Evolve 80 makes a great travelling companion too in noisy airports and public environments for phone calls or for music and relaxation. You can take your concentration zone wherever you need to go.

Connects to\*:
