

## Electronic hook switch control for Audiocodes 300 and 400 HD IP Phone Series

The Jabra Link 14201-27 EHS Adapter enables remote Electronic Hook Switch Control (EHS) with Jabra wireless headsets and AudioCodes 300 and 400 HD IP phones.

This means that users can hear ring tones, answer and end calls, adjust the volume or even mute the call up to 150 meters/450 feet away from their desks. The integration of handset and headset allows users to benefit from enhanced mobility and the ability to multitask while on a call. The wireless freedom improves work efficiency and ergonomics throughout the day.

### How it works

The EHS Adapter is a plug-and-play solution that converts from the DHSG standard used in AudioCodes phones to the DHSG standard used in Jabra headsets – and vice versa.

### Handset-Headset compatibility

The EHS Adapter is compatible with a wide range of AudioCodes phones. For more details see the technical specifications on page 2.

Works with:

desk phone

\* Variant dependant

The EHS Adapter can be used with these Jabra headsets

### Jabra Engage wireless headsets

Premium range of office wireless headsets with user-friendly base for intuitive call control. Connect up to five devices at once to the headset\*, including desk phone, softphone, analog phone, and 2 Bluetooth® devices.

### Jabra Pro 9400 Series
