

## **Jabra Biz 2400 Duo Ultra Noise Canceling, LS**

### **What should I do when I have trouble hearing the other person on the call when I use my Jabra headset?**

You can try turning up the volume on the phone or amplifier. Also, using an amplifier, such as the Jabra Link 850 or Jabra Link 860, is recommended. This enables you to turn up the volume. The use of DSP (Digital Signal Processing) can adjust sound levels to match user preferences and requirements.
