

Jabra Evolve2 55 - Link390c UC Stereo

How do I manually turn on/off the busylight(s) on my Jabra Evolve2 headset?

When you are wearing the headset and on a call, the busylight(s) automatically light up red to indicate that you are busy.

To manually turn on/off the busylight(s), simultaneously press the **Volume up** and **Volume down** buttons on the right earcup.

For Microsoft Teams head variants, manually turning the busylight(s) off will only affect the red LED(s). The purple LED(s) cannot be manually turned on/off.

Note

You can configure busylight settings using Jabra Sound+ ([Google Play](#) | [App Store](#)) on your smartphone or [Jabra Direct](#) on your computer.
