

How do I get the best fit with my Jabra Halo Smart?

The Jabra Halo Smart is designed to be worn around your neck.

You can shape the neckband, by bending it at the flex zones to provide the ultimate fit, comfort, and stability.

The earbuds are supplied with three sizes of EarGels: large, medium, and small. We recommend that you find the size that best fits your ear for the optimal sound experience. The correct EarGel will feel tight and will seal out background noise.

To properly attach the EarGel, align the indent on the EarGel (as shown) with the ridge on the earbud, and press them firmly together.
