

Jabra Elite 45e - Titanium Black

How do I access the voice assistant using my Jabra device?

To access the voice assistant on your smartphone using your Jabra device, press the **Mute/Voice** button when you are not on a call.

Note

You can configure voice assistant settings using Jabra Sound+.

Apple has introduced security updates in the iOS smartphone operating system (version 12.4 or later) that limit the Amazon Alexa voice assistant functionality to only work when Jabra Sound+ is open and in the foreground on your smartphone. This does not apply for other voice assistants.
