

Jabra Elite 45h - Copper Black

What is firmware?

Firmware is product software that controls how a device operates.

Jabra releases firmware that may improve performance and add features to your device. To ensure your Jabra device is performing optimally, we recommend you update to the latest available firmware.

To find available firmware for your device, go to the Updates section on the product support page. To find the support page for your Jabra device, start by [searching for it here](#).
