Jabra PanaCast 50 Video Bar System ZR

How do I update the firmware on the Jabra PanaCast 50 VBS?

Firmware updates improve performance or add new functionality to Jabra devices.

Updating firmware for the PanaCast 50 VBS can be done in the following ways:

- Locally on the video bar (mouse required) and touch controller
  For local updates, access the *Device settings* menu on the touch controller and video bar. Go to the *System* section and select *Update*. This manual process must be done individually for both devices.

- Remotely using the Web Console for the video bar and touch controller
  For remote updates, access the Web Console of the video bar and touch controller individually. Enter the IP address of the video bar and touch controller in a browser. If this is the first time accessing the Web Console, the default username is *admin* and the password is the *last 6 digits of the serial number* of the device used to access the Web Console.

- Remotely using the web portal of your video conferencing service provider - ideal for mass management

- Remotely using the Jabra Plus - ideal for mass management
