

Jabra Pro 9450 Mono

How do I pair a second Jabra headset with the Jabra Pro 9450 base?

Start with the headset undocked, and the base in standby mode. On the base, the **Phone state** icons for desk phone and softphone should either be off or white.

If the previously paired headset is within range, turn it off by pressing and holding the **Answer/end** button until the LEDs on the microphone flash red.

Dock the second headset on the base, and the **Headset docking** icon (next to the **Battery** icon) will flash quickly several times. When the **Headset docking** icon turns solid, the pairing will be complete and the headset will be ready to use with this base.
