

Jabra Elite 10 Gen 2 - Soft White

How do I enable LE Audio on my Android smartphone?

You must update the firmware of your connected Jabra earbuds to the latest version first, then delete the Bluetooth pairing in your smartphone's settings. Once you have re-paired your earbuds with your smartphone, follow these steps.

Prerequisites

- Android 15 or later

1. On your Android device, navigate to Settings > Connected devices.
2. Tap the settings icon next to the connected Jabra device name.
3. Scroll down to **LE Audio** and tap the slider to toggle it on.
