

Jabra Engage 65 SE - Convertible

How do I connect my Jabra Engage with my Avaya 1408, 1416, 1608, 1616, 9404, 9408, 9504, 9508, 9608, 9610, 9611G, 9620, 9620C, 9620L, 9621G, 9630, 9630G, 9640C, 9640G, 9641G, 9650, 9650C, 9670 desk phone so I have remote call control using my headset?

Prerequisites

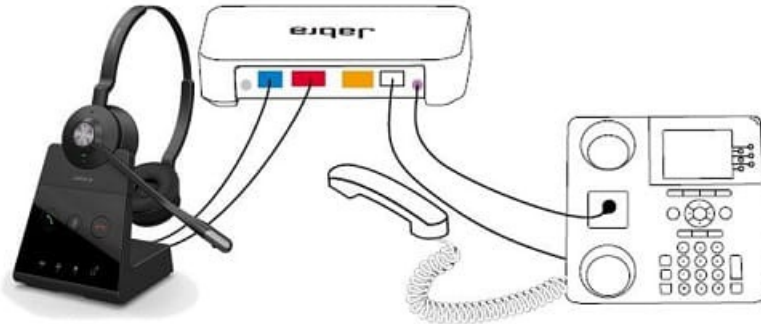

- Jabra Link 14201-20 Electronic Hook Switch (EHS)
- One of the following Avaya phones:
 - 1408 / 1416
 - 1608 / 1616
 - 9404 / 9408
 - 9504 / 9508
 - 9608 / 9610 / 9611G / 9620 / 9620C / 9620L / 9621G
 - 9630 / 9630G / 9640C / 9640G / 9641G / 9650 / 9650C / 9670

Connect your headset

1. Plug the phone cable supplied with the headset into the port marked with a phone icon  on your Jabra base, and to the port marked with a phone icon on the Jabra EHS adapter.
2. Connect the cable marked red to the port marked AUX on the Jabra EHS adapter and to the AUX port on your Jabra base.
3. Connect the white cable marked C to the port marked "Headset/handset" on the Jabra EHS adapter and to the "headset" port on the desk phone.

Important: If you have an Avaya 1408/1416 or 9404/9408 desk phone, use the white cable marked "A" (instead of the "C" cable).

4. Connect the ring signal sensor to the Jabra EHS adapter and fasten it in the middle of the loudspeaker of the desk phone. This ensures that the desk phone can signal an incoming call to the Jabra headset.

Note that the Jabra headset will not be fully functional until the colored markings for all cables have been connected to the Jabra EHS adapter, as illustrated.

Configure your headset when connecting to a desk phone for the first time

- For Jabra Engage 75/75 SE, follow the onscreen setup wizard on the base.
- For Jabra Engage 45 SE/65/65 SE, the initial setup is complete after connecting the cables.

Additional setup information for your Jabra products

- EHS cable/adapter type: DHSB.
- Clear dial tone switch: set to position "A".
- We recommend setting the microphone volume to "7" out of 13.
