

How long will my Comply Foam Tips last?

For peak performance we recommend changing the Comply Foam Tips every three months. This lifespan is based on daily use of 4-8 hours. The lifespan of the Comply Foam Tips may vary. An active user may have to replace their tips more often than an average user.

To avoid early tearing or disintegration of the tips, prepare them before each use. Roll and compress them between your fingers before inserting. After inserting, hold them in place until they regain their shape and conform to your ear canal. This will create a custom fit.
