

What happens if I choose to not update my Jabra device with an automatic firmware update?

Prerequisites

- [Jabra Direct - latest version](#)

If you choose to not update your Jabra device with an automatic firmware update*, the countdown to the update will cease, and the firmware update will not be installed.

The firmware update will then be available for you to install anytime in Jabra Direct > Updates.

Note

*If a device is managed in Jabra Xpress, this option is not available for individual users.
