

Jabra Elite Active 75t - Grey

What is the auto-power-off feature?

Your Jabra earbuds turn off to conserve battery. The right earbud will automatically turn off if it is out of range of your mobile device for 15 minutes, it is not in the charging case, or it has been inactive for 1 hour. The left earbud will automatically turn off if it has not had a connection with the right earbud for 15 minutes and it is not in the charging case.

To turn on the earbuds, simultaneously press and hold (1 second) the **Left** and **Right** buttons. Alternatively, place them in the charging case and then take them out again.
