Jabra Evolve2 55 - Link380c MS Stereo

How does sleep mode work on my Jabra headset?

If your headset is turned on but not being used for music or calls, it automatically enters sleep mode after 4 hours to conserve battery. To exit sleep mode, press any button.

After 24 hours of no interaction with the headset, it will turn off completely. To turn it on, press and hold (2 seconds) the **Power** button.

You can adjust the length of time before the headset enters sleep mode using Jabra Sound+ (Google Play | App Store) on your smartphone or Jabra Direct on your computer.
