

How do I pair my Jabra Sport Pulse Wireless with a third-party app?

To pair with a third-party app such as Endomondo, Runkeeper, Strava, Runtastic, or MapMyFitness, follow these steps:

1. Make sure that your Jabra Sport Pulse Wireless is already paired to your mobile phone.
2. Turn on Bluetooth on your mobile phone.
3. Turn on the Jabra Sport Pulse Wireless by pressing and holding (3 seconds) the **Multi-function** button until the indicator light flashes green.
4. Wait until the Jabra Sport Pulse Wireless is paired.

5. In the third-party app, add the Jabra Sport Pulse Wireless as a heart rate monitor. Choose “Bluetooth low energy” if you are prompted. You can refer to the user manual of the app for more information.
6. When it is successfully paired, the Jabra Sport Pulse Wireless announces “Bluetooth Smart Connected”.
7. When you open the third-party app, the Jabra Sport Pulse Wireless

automatically turns on Bluetooth Smart and sends the heart rate data.
