

Jabra Handset 450

Can I use my Jabra Handset 450 with the Cisco DX series softphone out of the box?

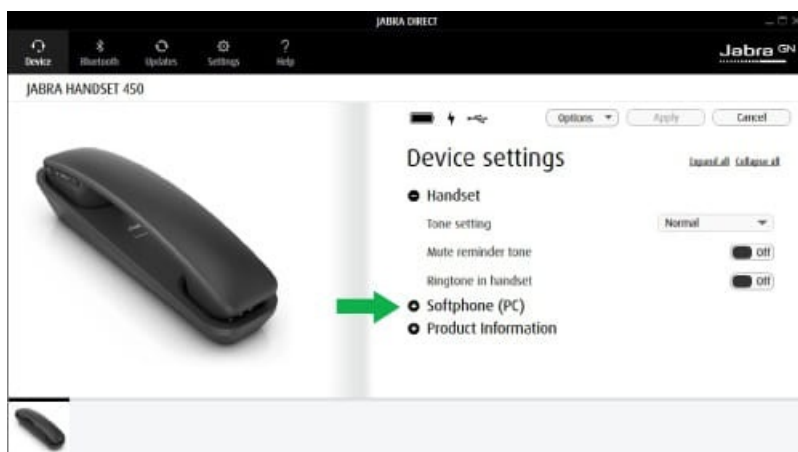

Prerequisites

- [Jabra Direct version 3.x or later](#)

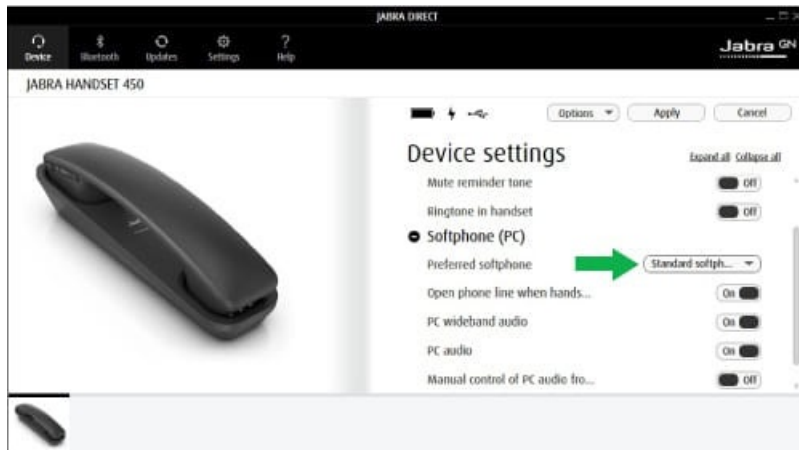

You can use the Jabra Handset 450 with a Cisco DX series softphone out of the box.

If the Jabra Handset 450 has first been connected to a computer (for example, to update firmware or use with another softphone), you need to update a setting in Jabra Direct before you can use it with a Cisco DX series softphone. While still connected to the computer, follow these steps.

1. Open Jabra Direct.
2. Click **Device settings**.
3. Scroll down and expand **Softphone (PC)**.

4. In **Preferred softphone**, select **Standard softphone**.

5. Click **Apply**.
6. Disconnect the Jabra Handset 450 from the computer.
7. Reconnect to the DX series softphone.
