

Jabra Elite 10 - Gloss Black

How do I get the best experience when I unpack my new Jabra Elite 10 earbuds?

To get the best experience with your new Jabra Elite 10 earbuds, we recommend you follow these first-time steps.

1. Place both earbuds in the charging case and charge them for up to 3 hours.
2. When you open the lid, the battery LED inside the charging case will flash red, yellow, or green to indicate the current battery status of the earbuds. The LED on the front of the charging case indicates the battery status of the charging case.
3. After charging, remove the earbuds from the charging case, and they will turn on and go into pairing mode automatically. Pair the earbuds with your smartphone.
4. Remove all the EarGels from the box. Start with the EarGels that are already fitted on the earbud and try each size until the fit feels tight and snug.

Note

A good fit and seal is essential for obtaining the best sound experience. Make sure to try all the EarGel sizes until you find the fit that gives you the best combination of comfort and sound quality. You may benefit from using a different size EarGel in each ear.

5. Download Jabra Sound+. The app lets you change your audio experience and settings. Jabra Sound+ will also notify you when new firmware is available, ensuring that you always have the best performance with your Jabra earbuds.

6. We recommend you register your earbuds using Jabra Sound+ to activate the 2-year warranty.

Your Jabra Elite 10 earbuds are now ready for up to 6 hours of use for music and calls.
