

Jabra Pro 9460 Duo

How do I manually set up conference call mode on my Jabra Pro headset?

To manually set up conference call mode on your Jabra headset, follow these steps.

1. Remove the headset from the base, and make a call.
This headset becomes the primary headset, and it controls the conference.
2. During the call, dock a secondary headset in the base of the primary headset.
3. Select **Sec.** on the touchscreen to connect the secondary headset.

4. When you hear a signal tone in the primary headset, press the **Multi-function** button on the primary headset to start the conference call.
5. Repeat the procedure for additional headsets that join the conference. Up to four headsets per base can join.

Secondary headsets can leave the conference by pressing the **Multi-function** button.
