Jabra Sport Life

Why does the Jabra Sport Life app use English instead of the language of my Android phone?

Prerequisites

- Jabra Sport Life - Android

If your Android phone uses one of the supported languages, Jabra Sport Life will automatically detect and use the same language. The supported languages are:

- English (default language)
- German
- French
- Spanish
- Italian
- Korean
- Japanese
- Chinese Simplified
- Chinese Traditional

If your Android phone uses a language that is not supported, then Jabra Sport Life uses English which is the default language.

If you use Chinese Traditional on your Android phone, Jabra Sport Life will use English. To change the language used by Jabra Sport Life from English to Chinese Simplified, you must install Chinese Simplified instead of Chinese Traditional.

Note: This change may be applied to other apps that use the same language logic as Jabra Sport Life, and this could result in corresponding changes to the language they use.
