

Jabra Evolve 75e UC

How do I clean my Jabra earbuds?

Earbuds become soiled over time due to earwax, sweat, or oil. Accumulated soil may block the speaker and result in lower than normal volume. Therefore, it is important to practice aural hygiene and also to clean the earbuds regularly.

To clean the earbud, use a slightly dampened cloth – do not use harsh cleaning agents. To clean the EarGel, remove it from the speaker/earbud. Use a swab, slightly dampened with warm water, to wipe the outer surface and around the hole in the middle of the EarGel. Let the earbud and EarGel air dry completely before the next use.

Note

We recommend you do not insert sharp objects to clean the speaker because these could cause damage.
