

Jabra Elite 65t - Copper Black

How does the auto-power-off feature work on my Jabra true wireless earbuds?

The Jabra true wireless earbuds turn off to conserve battery. The right earbud will automatically turn off if it is out of range of your smartphone for 15 minutes, it is not in the charging case, or it has been inactive for 1 hour. The left earbud will automatically turn off if it has not had a connection with the right earbud for 15 minutes, and it is not in the charging case.

To turn the earbuds on, place them in the charging case, or simultaneously press and hold the **Multi-function** button on the right earbud, and the **Volume down** button on the left earbud, until the LED flashes green.
