

Jabra Engage 75 Convertible

How do I connect my Jabra Engage with my Siemens OpenStage 30, 40, 60, 80 desk phone so I have remote call control using my headset?

Prerequisites

- Jabra Link 14201-10 Electronic Hook Switch (EHS) cable
- One of the following Siemens OpenStage phones: 30, 40, 60, 80

Connect your headset

1. Plug the 1-sided end of the Jabra EHS cable marked blue into the desk phone port marked with a headset icon.
2. For the 2-sided end of the cable, plug the RJ10 (small) plug of the Jabra EHS cable into the headset base port marked with a phone icon  and the RJ45 (wide) plug into the port marked with AUX.

Configure your headset when connecting to a desk phone for the first time

- For Jabra Engage 75/75 SE, follow the onscreen setup wizard on the base.
- For Jabra Engage 45 SE/65/65 SE, the initial setup is complete after connecting the cables.

Additional setup information for your Jabra products

- EHS cable/adaptor type: DHSG.
- Clear dial tone switch: set to position "A".
- We recommend setting the microphone volume to "6" out of 13.

Phone settings

Desk phones using software version 3.18 require the following additional setup steps:

- Siemens OpenStage 30, 40: **Menu > Audio Accessories > Headset > Cordless**
- Siemens OpenStage 60, 80:
Menu > User > Audio > Settings > Headset > Cordless

Important

The dial tone signal in the headset is transmitted only if the standard ringtones are used. No ringtone is transmitted for mp3 ringtones.
