Jabra Elite Active 65t - Titanium Black

How do I pair my Jabra earbuds with my mobile device?

To pair with your mobile device for the first time, follow these steps.

1. Turn on the Bluetooth setting on your handheld mobile device.
2. When you unpack your Jabra earbuds from the box, turn them on by pressing and holding the **Multi-function** button on the right earbud (1 second) until the LED flashes green.
   The earbuds enter pairing mode automatically.
3. Go to the Bluetooth menu on your mobile device and select the Jabra earbuds to complete the pairing. Alternatively, wear the earbuds to hear the voice guided instructions.
   Enter "0000" (four zeros) if you are asked for a pin code.
   If pairing is successful, your earbuds will appear in the list of connected Bluetooth devices on your mobile device. The Bluetooth connection will also be announced in the earbuds.

To re-pair with your mobile device or pair with an additional mobile device, follow these steps.
1. Turn on the Bluetooth setting on your handheld mobile device.
2. Start with the right earbud turned off and in your hand (not in the charging case). To turn off the right earbud, press and hold (5 seconds) the **Multi-function** button, until the LED flashes red.
3. To enter pairing mode, press and hold (5 seconds) the **Multi-function** button until the LED flashes blue.
4. To pair, go to the Bluetooth menu on your mobile device and select the Jabra product from the list. Alternatively, wear the earbuds to hear the voice guided instructions.
   Enter "0000" (four zeros) if you are asked for a pin code.
   When you take the left earbud out of the charging case, it will

connect automatically with the right earbud. If the left earbud is turned off, press and hold (1 second) the **Volume down** button to turn it on.

In daily use, when you turn on the earbuds, they will automatically reconnect with the last previously paired device, if it is turned on and within range.

Note

If pairing is not successful, try the pairing steps again, or try pairing with a different Bluetooth device. For troubleshooting tips, see here.

Optionally, try using the Bluetooth Pairing Guide which provides detailed steps for pairing with a mobile device.
