**Jabra** GN

Jabra Elite 85h - Titanium Black

How do I charge my Jabra Elite 85h?

To charge your Jabra Elite 85h, connect the USB charging cable to the USB charging port on the right earcup. We recommend you charge the headphones using the supplied Jabra charging cable. However, it is possible to use a compatible charger.

Right earcup

Note
The LED will flash red, then flash yellow, and then flash green when charging. While the LED flashes green, the battery is still charging. When the LED is solid green, the battery is fully charged. It takes approximately 2½ to 3 hours to fully charge the battery. If the headphones are fully out of battery, 15 minutes of charging will give 5 hours of battery.
