Jabra Elite 85h - Copper Black

How do I access the voice assistant using my Jabra Elite 85h?

To access the voice assistant on your smartphone using your Jabra Elite 85h, press the **Voice** button when you are not on a call.

Note

Before you can access the voice assistant, you must first activate it on your smartphone. Refer to the user manual for your smartphone for the relevant instructions.

Apple has introduced security updates in the iOS smartphone operating system (version 12.4 or later) that limit the Amazon Alexa voice assistant functionality to only work when Jabra Sound+ is open and in the foreground on your smartphone. This does not apply for other voice assistants.
