

# Jabra PanaCast

## Do I need a separate power adapter for the Jabra PanaCast?

If you are connecting the Jabra PanaCast to a USB 3.0 port, you do not need an external power supply. The camera will be powered through the USB-C cable and will not require additional power.

However, if you are connecting to a USB 2.0 port, an external powered USB hub is required to power the camera. See the **Accessories** section for more information.
