

# Jabra PanaCast

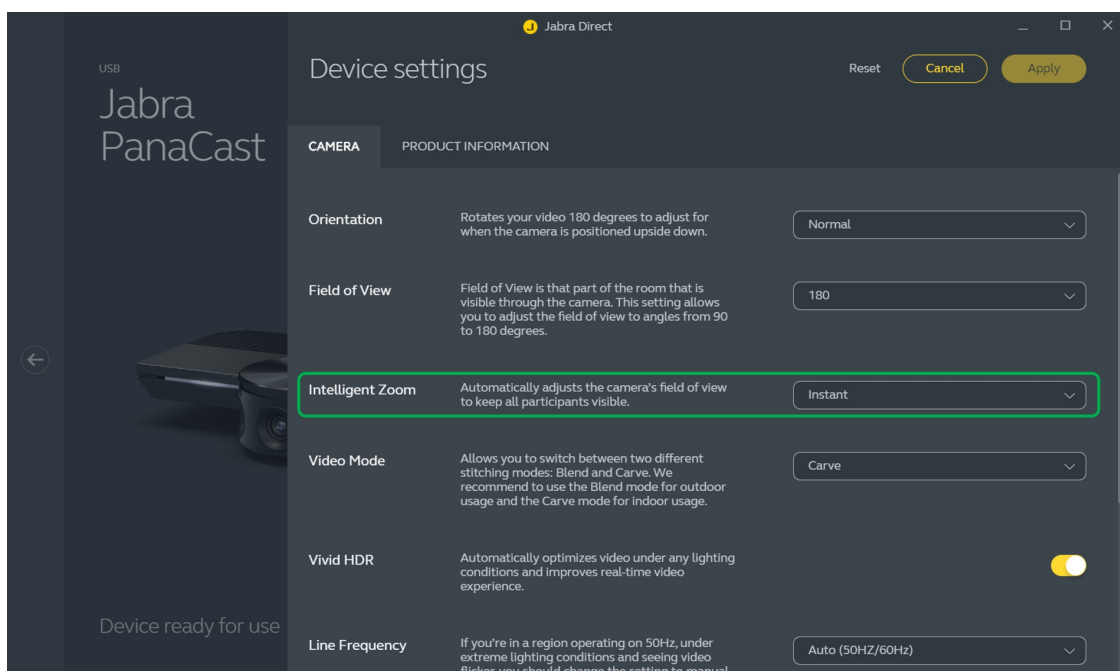

## How do I set Intelligent Zoom using Jabra Direct?

### Prerequisites

- [Jabra Direct - latest version](#)
- [Jabra PanaCast firmware - latest version](#)

To set Intelligent Zoom, follow these steps.

1. In Jabra Direct, select the Jabra PanaCast.
2. Click **Device**.
3. In **Device Settings, Camera, Intelligent Zoom**, select from these options:
  - **Off**
  - **Instant** - The field of view will center the person/people and crop the shot in a single step.
  - **Natural** - The field of view will center the person/people and crop the shot in a step-by-step mode.

4. Click **Apply**.

Jabra PanaCast will reboot and be ready to use the new setting.

**Note**

Intelligent Zoom works at an approximate distance of up to 5.8m/19ft from the camera.

Intelligent Zoom disables the manual control of Pan, Tilt, and Zoom in Jabra Direct.

We recommend you do not change settings during an active video conference call.
