

# Jabra Speak 750 - MS Teams

## How do I position the Jabra Speak 750?

There are a variety of positions for using the Jabra Speak 750. Choose one of the following to suit your situation.

### Small-sized meeting room

For optimal audio quality, position the Jabra speakerphone in the center of the table, up to 2.3m/7.5ft from each participant, but no closer than 0.5m/1.6ft. A single Jabra Speak 750 is ideal for up to 6 people.

### Medium-sized meeting room

For meetings of up to 12 people in a single room, position two Jabra Speak 750 speakerphones up to 4m/13ft apart, but no closer than 0.5m/1.6ft. Positioning them at either end of the table, between 0.5m/1.6ft to 2.3m/7.5 ft from participants, will ensure optimal audio quality.

If two Jabra speakerphones are within a 4m/13ft range of each other,

the **Link** button will be visible. To temporarily link the audio between them, press the **Link** button on both speakerphones. To unlink the speakerphones, press the **Link** button on one of the speakerphones.

## Desk

When using the Jabra Speak 750 at your desk, we recommend you put the speakerphone into an upright position using the table stand. This will better direct the audio towards you for a richer music and media experience.

## Stereo media

When presenting, viewing, or listening to stereo multimedia, you can position two Jabra speakerphones on either side of a projector or monitor for stereo sound.
