Jabra Elite Active 75t - Dark Grey

How do I set up Active Noise Cancellation (ANC) on my Jabra Elite 75t/Elite Active 75t?

Prerequisites
- Jabra Sound+ version 4.7 or later
- Jabra Elite 75t/Elite Active 75t firmware version 2.0.0 or later

To set up ANC on your Jabra Elite 75t/Elite Active 75t, follow these steps.

1. On your mobile device, ensure that Jabra Sound+ is updated to version 4.7 or later.
2. In Jabra Sound+, update the Jabra Elite 75t/Elite Active 75t firmware to version 2.0.0 or later.
   When the update is completed, you will be invited to add ANC to your headset*.
3. Tap **Add ANC to your headset**.
4. Tap **Add Personalized ANC** and follow the onscreen instructions.
5. Adjust the ANC to fit your individual hearing. For optimal results, do the following:
   - Ensure the earbuds fit tightly and securely in your ears. The fit of the EarGels should give a sealing effect.
   - Personalize the ANC while you are in a noisy environment. For example, indoors while household appliances are running, or outdoors where there is traffic or crowd noise.

Note
*If you miss the initial prompt to add personalized ANC, tap the **Settings** icon, **Personalize your headset**, **Active Noise Cancellation**, **Take a guided tour**.

Download Jabra Sound+ from Google Play on your Android device or from the App Store on your iOS device.
