

Jabra Elite 45h - Black

How does sleep mode work on my Jabra headphones?

If your headphones are turned on but not in use, they automatically enter sleep mode after 30 minutes to conserve battery. To exit sleep mode, press any button.

After 24 hours of sleep mode, the headphones turn off completely. To turn them on, slide the **On/Off** switch off and then on.

You can adjust the length of time before the headphones enter sleep mode using Jabra Sound+.

Don't have Jabra Sound+ yet? You can download it from [Google Play](#) on your Android device and from the [App Store](#) on your iOS device.
