

# Jabra Elite Active 75t Wireless Charging - Grey

## Can I change the button functions on my Jabra Elite 75t/Elite Active 75t?

### Prerequisites

- Jabra Elite 75t/Elite Active 75t firmware version 1.31 or later
- Jabra Sound+ version 4.3 or later

Yes, you can change the default button functions on your earbuds by using MyControls in the Jabra Sound+ app. You can configure single, double, or triple-press actions for how the buttons will control media, call handling, and Sound Modes.

Your preferred button configurations will be saved on your Jabra device, but you can always reset your device to the default settings.

### Note

Download Jabra Sound+ from [Google Play](#) to your Android device or from the [App Store](#) to your iOS device.
