

Jabra Elite 85t - Titanium Black

What is MyFit?

Prerequisites

- [Jabra Sound+ - Android](#)
- [Jabra Sound+ - iOS](#)

MyFit is a feature in the Jabra Sound+ app that checks the fit of each earbud to help you determine the best position of the earbud and EarGel size. The fit is important for obtaining a good audio experience and Active Noise Cancellation (ANC).

When you start MyFit, a multitone is played in the earbuds to detect if there is a sound leakage from the EarGels. If MyFit detects a sound leakage, you will be asked to adjust the earbuds, change the EarGel size, or do both to improve the seal.

You can find MyFit under **Personalize your headset** in the Jabra Sound+ app. It takes a few minutes to complete.
