

## Jabra Elite 85t - Black

### Why does the battery of my Jabra Elite 85t right earbud drain more quickly than the left earbud?

You may notice in the Jabra Sound+ app that the battery of your Jabra Elite 85t right earbud drains more quickly than the left earbud. However, this is no cause for concern. Because the right earbud performs more functions than the left, including handling all communication between the earbuds and the connected mobile device, the right earbud drains more quickly. The earbuds will warn you when the battery is getting low, and you can place them in the charging case for 15 minutes to get up to 60 minutes of use, or leave them in the case longer to reach a full charge.
