

Jabra Elite 3 - Dark Grey

How do I manually turn on/off HearThrough on my Jabra Elite 3

Prerequisites

- [Jabra Sound+ - iOS](#)
- [Jabra Sound+ - Android](#)

HearThrough is enabled by default on your Jabra device. When you are not on a call, you can turn on and off HearThrough by pressing the button on the **Left** earbud.

Note

HearThrough will turn off automatically during a call, and then resume when the call is finished.

You can also turn on and off HearThrough on under Sound modes on the homepage in Jabra Sound+.
