

Jabra Elite 3 - Light Beige

How do I enable Spotify playback for my Jabra Elite earbuds?

Prerequisites

- Android - version 7 or later
- Spotify - latest version
- Jabra Sound+ - latest version

In Jabra Sound+, you can set up your Jabra Elite earbuds to playback from Spotify with a double-press on the Left button.

To enable Spotify playback, go to Jabra Sound+ > Settings icon > Voice Assistant/Spotify. Select **Spotify**.

When you are not on a call or already listening to music, you can double-press the Left button to resume the last played song. If Spotify is open on your mobile device, a double-press on the Left button plays a Spotify recommended song. Spotify playback also works in mono earbud mode if you use the Left earbud.

Note

If you enable Spotify in Jabra Sound+, you cannot also use the voice assistant because they use the same button control. A double-press on the Left button is by default set up to activate the voice assistant.
