

Jabra Evolve2 Buds - USB-C UC

How do I get the best fit with my Jabra Evolve2 Buds?

Wearing the earbuds

Insert each earbud into your ear with the microphone pointing towards your mouth. If your voice cannot be heard clearly when on a call, ensure that the earbuds are positioned correctly with the microphones pointing towards your mouth.

EarGels

A good fit is important for obtaining the optimal audio experience and Active Noise Cancellation (ANC). The fit should feel light and comfortable.

To obtain a good fit, take the MyFit test in Jabra Sound+. MyFit will check the fit of each earbud to determine if a slight repositioning of the earbud, or a different EarGel size is recommended. The earbuds come with three sizes of EarGels. The medium EarGels are pre-mounted on the earbuds, but it is recommended to try each size to determine which fits best.
