

Jabra Engage 50 II Link - USB-C MS

How does the SmartRinger work?

When the Jabra Engage 50 II is not being worn but is lying flat on a desk or table, incoming calls will play a ringtone from the Jabra Engage 50 II Link controller.

When there is an incoming call, you can adjust the volume of the SmartRinger using the volume control dial on the Jabra Engage 50 II Link.

When not on a call, you can select a new ringtone by simultaneously pressing both programmable buttons to cycle between the 3 ringtone options.

Note

The SmartRinger setting is enabled by default. You can configure the SmartRinger and ringtone using Jabra Direct.
