Jabra PanaCast 50 Room System ZR

How do I use the camera controller with the Jabra PanaCast 50?

Prerequisites

- Jabra Direct - latest version
- Jabra Sound+ - Android
- Jabra Sound+ - iOS

The camera controller is a tool in Jabra Direct and Jabra Sound+ that enables remote control of the Jabra PanaCast 50 from a computer, phone, or tablet.

Using the camera controller, you can:

- Use Automatic zoom modes: Virtual Director or Intelligent Zoom.
- Set up and share the view of a whiteboard.
- Adjust the camera view using the Pan, Tilt, Zoom controls.
- Select and edit Pan, Tilt, Zoom presets.
- Adjust the image quality settings such as brightness and contrast. Note that adjustments to the image quality are temporary and not saved in Jabra Direct. They will apply until your computer is either disconnected from the Jabra PanaCast 50 or rebooted.
