

Jabra Enhance Plus - Dark Grey

Do the Jabra Enhance Plus earbuds help mask tinnitus?

Jabra Enhance Plus is not specifically recommended to address the ringing in the ears known as tinnitus. However, people with tinnitus occasionally find relief from amplification.

Jabra Enhance Plus earbuds can also be used, in conjunction with the free ReSound Relief app, to stream sounds that mask the ringing noise caused by tinnitus.

For sudden onset or worsening of tinnitus symptoms, consult with a hearing healthcare provider.
