Jabra Enhance Plus - Gold Beige

How do I pair my Jabra Enhance Plus with my iOS device?

Prerequisite
- iOS 14 or later

First-time pairing

Use the Jabra Enhance app to guide you through the pairing process. The pairing steps from the app are repeated as follows.

1. Remove your new Jabra Enhance Plus earbuds from the charging case to turn them on. The earbuds will enter pairing mode automatically, and the LEDs on the earbuds will flash blue to indicate they are ready to pair.
   The pairing window will be open for three minutes. If the LEDs on one or both earbuds stop flashing blue, you will have to restart the pairing process.
2. On your iOS device, navigate to Settings > Accessibility > Hearing Devices.
3. In **Your Hearing Devices**, tap to connect to the Jabra Enhance Plus. Note that the name of the earbuds may differ depending on the name that was entered when the product was registered.
4. Accept both Bluetooth pairing requests by tapping **Pair**. This will complete the pairing of both the left and right earbuds with your iOS device.
5. Tap the banner to return to the Jabra Enhance app and continue setting up the earbuds.

Manual pairing

If you want to pair the Jabra Enhance Plus earbuds with a second iOS

device, or if the earbuds have been unpaired from your first iOS device, you can pair them manually.

To manually pair, follow these steps.

1. Remove the earbuds from the charging case to turn them on. After a few seconds, the LEDs will light green.
2. Press and hold (3 seconds) both the left and the right earbud buttons. The LEDs will flash blue to indicate the earbuds are ready to pair.
   The LEDs are located below the Jabra logo on the button. If you press the button above the Jabra logo, it will be easier to see the LED when it lights.
3. On your iOS device, navigate to Settings > Accessibility > Hearing Devices.
4. In **Your Hearing Devices**, tap to connect to the Jabra Enhance Plus. Note that the name of the earbuds may differ depending on the name that was entered when the product was registered.
5. Accept both Bluetooth pairing requests by tapping **Pair**. This will complete the pairing of both the left and right earbuds with your iOS device.
6. Tap the banner to return to the Jabra Enhance app and continue setting up the earbuds.

Note

To view a video about the pairing process, tap the menu icon in the top right corner of the Jabra Enhance app. Then tap **Support and guides**.

You can download the Jabra Enhance app from the App Store.
