

Jabra Enhance Plus - Gold Beige

Why does my Jabra Enhance Plus not appear in the list of paired Bluetooth devices on my iPhone?

Jabra Enhance Plus, unlike ordinary Bluetooth earbuds, has been certified under Apple's Made For iPhone (MFi) hearing device program.

You can monitor the battery level and set iOS preferences for the earbuds by navigating to Settings > Accessibility > Hearing Devices on your iPhone.

Note

As the personalization of each Jabra Enhance Plus earbud is unique, we recommend keeping the volume level of each earbud equal in the iOS settings. You can deselect the **Adjust independently** toggle in iOS.
