

Jabra PanaCast 50 Video Bar System MS

What camera modes are available with the Jabra PanaCast 50 VBS?

You can select from the following camera modes.

- **Intelligent Zoom (default setting)**
Dynamically frames all visible people within 6 meters (20 feet).
- **Virtual Director**
Dynamically switches to and focuses on the person who is speaking. When you select this option, the Transition speed and Transition style settings will become available.
- **Panoramic View**
Displays a panoramic view of the meeting room.
- **Single-stream Dynamic Composition**
Displays a tiled view of up to four speakers and a full view of the meeting room. The tiled view will dynamically update to display the participants who are actively speaking.
- **Smart Gallery - Multi-stream only for Zoom Rooms**
Creates individual video streams of in-room participants in their own video tile, as well as a panoramic view of the meeting room. If there are more than 5 people in a room, each video stream will be split into a tiled view to show more people.

Note

- Only one Camera mode can be active at a time.
- Some features may require a firmware update to access the settings.
