

Jabra Elite 8 Active - Caramel

Can I have Spotify Tap and the voice assistant enabled at the same time?

Prerequisites

- Jabra Sound+ - latest version
- Spotify - latest version

No. The Spotify Tap and voice assistant use the same button control on the earbuds (a double-press on the Left button) and therefore, you cannot have both features enabled at the same time.

By default, a double-press on the Left button activates the voice assistant.
