Jabra Elite 8 Active - Black

Why did the audio pause when I removed one of my earbuds?

Prerequisites

- Jabra Sound+ - Android
- Jabra Sound+ - iOS

If you remove one of the earbuds while you are listening to audio, the audio will automatically pause. If you place the earbud in your ear again within 60 seconds, the audio will resume automatically. If you place the earbud in your ear again after more than 60 seconds have passed, press the **Right** button to resume the audio.
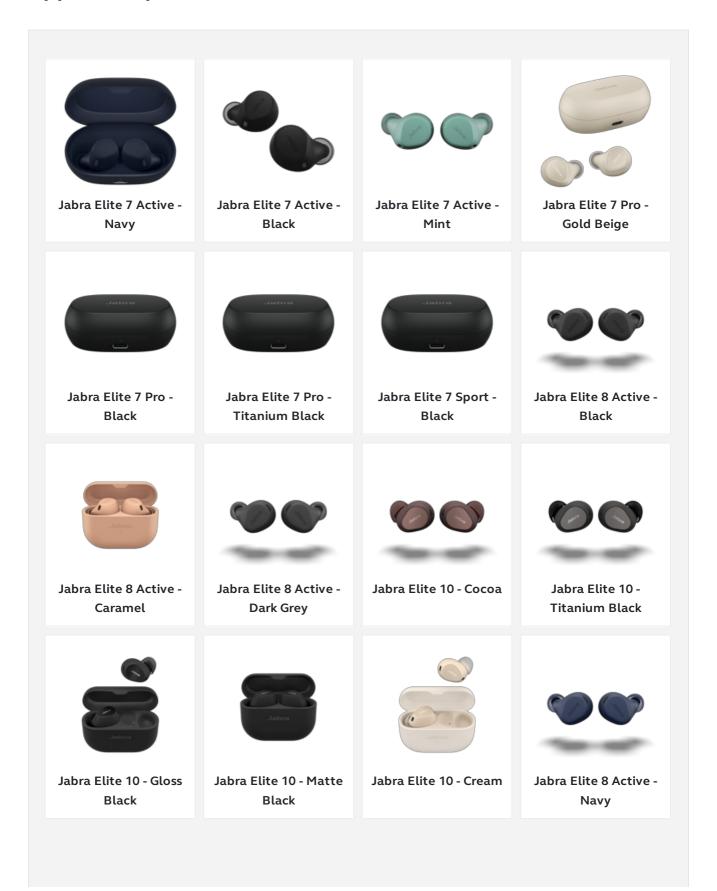

Note

Auto-pause audio is on by default. To change this setting in Jabra Sound+, go to the Settings icon > Headset settings > Audio experience.

You can download Jabra Sound+ from Google Play on your Android device and from the App Store on your iOS device.
